Education

Springboard – Software Engineering Career Track

2020–2021

University of California, Los Angeles (UCLA) – B.A. Asian Studies

2017-2019

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Firebase, Strapi (Headless CMS)

Database: PostgreSQL (Neon, Render), Firestore

Tools: Git, GitHub, VS Code, Vercel

TECHNICAL PROJECTS

Job Tracker App — Next.js · TypeScript · Node.js · Express · PostgreSQL (Neon) · Tailwind CSS

- Built a full-stack job application tracking platform with separate Next.js frontend and Express/Node.js backend communicating via RESTful API.
- Designed and implemented a PostgreSQL database schema on Neon to store job listings with status tracking.
- Created full CRUD functionality — users can add, edit, delete, and filter job entries through a responsive, mobile-first UI.
- Structured project with clean client/server separation: Next.js handles UI and routing, Express handles API logic and database queries

Unroasted - Online Coffee Community — React · Tailwind CSS · Firebase · Strapi (Headless CMS)

- Built an end-to-end coffee community platform with **React + Tailwind**, featuring user-generated posts (reviews, brewing tips, recommendations) and a mobile-first responsive UI.
- Implemented **Firebase Auth + Firestore** for authentication and data persistence, supporting protected routes and user-only actions.
- Integrated **Strapi (Headless CMS)** for admin-managed content delivery, separating published content from community data for maintainability.
- Designed a content workflow where non-developers can update articles in Strapi while community activity remains real-time via Firebase.

Developer Portfolio Website — React · Next.js · TypeScript · Tailwind CSS

- Designed and developed a responsive single-page portfolio website using React, TypeScript, and Tailwind CSS
- Created a clean, modern interface to showcase projects, technical skills, and professional experience
- Focused on mobile responsiveness, visual clarity, and polished presentation for a strong user experience
- Developed responsive grid layouts and dynamic routing using Next.js App Router

Cafe Website - Live Commercial Project

- Developed and deployed a single-page application for a live commercial cafe using React.js and Tailwind CSS
- Built a fully responsive, mobile-friendly interface optimized for customer engagement across all devices
- Integrated cafe information including menu, hours, location, and contact details in an intuitive layout
- Improved mobile Performance/SEO through Lighthouse-guided optimization on a Vercel-deployed React site—reduced page weight ~3MB → ~150KB (~95%), improved LCP ~4.0s → ~1.5s, and raised Performance ~79–82 → ~90–95 via image compression, hero image preloading, lazy loading, and non-blocking analytics scripts.

Professional Experience

RNY Coffee Studio

General Manager

Los Angeles, California
October 2024 - Present

- Led development and deployment of a production React website serving live customers
- Translated operational and business requirements into scalable digital solutions
- Managed end-to-end cafe launch, including systems, staffing, and vendor coordination
